

### REMOVING THE DOOR

1. Remove the door catchers (2) with a flathead screwdriver by leveraging against the side of the catcher until one side pops out. **(A)**
2. Take off the door handle. **(B)**
3. Line up the clips with the 90 degree angle, and lift to remove the door. **(C)**
4. Remove the hinge pieces (2) with a flathead screwdriver by leveraging against the side of the hinge piece until one side pops out. **(D)**

**A**

**B**

**C**

**D**

## REVERSING THE DOOR

1. Install hinge pieces (2). Make sure curved edge faces the inside of the cabinet. Press tab with flathead screwdriver to pop in, with force if needed. **(A)**
2. Cut flag pole off bottom (x2) after installation. **(B)**
3. Flip door 180 degrees so pin holes are on the opposite side. Line up the clips with the 90 degree angle, and lift to place the door on the hinges. **(C)**
4. Place the handle back on the door. **(D)**

**A**

**B**

**C**

**D**
